

Archive Shelving Solutions

Rivet long span shelving and Maxispan long span shelving are ideal for archive box storage.

The table below is based on standard archive box dimensions:
260mm H x 320mm W x 400mm D

Some archive boxes have different dimensions, so please check the dimensions of your boxes.

Our shelving storage capacities assume boxes are stored two high on each lower shelf, and one high on the top shelf. This takes into account a standard 2.4m ceiling height.

Typical archive boxes can weight up to 15kg. Please consider your OHS requirements in determining where the top shelf level can be set.

Archive shelving units

| Box Capacity | Depth | Dimensions H x L x D mm |
|--------------|---------|----------------------------|
| 21 boxes | 1 box | 2150 x 1200 x 450 |
| 28 Boxes | 1 box | 2150 x 1500 x 450 |
| 35 boxes | 1 box | 2150 x 1800 x 450 |
| 42 boxes | 2 boxes | 2150 x 1200 x 900 |
| 56 boxes | 2 boxes | 2150 x 1500 x 900 |
| 70 boxes | 2 boxes | 2150 x 1800 x 900 |

Note: Boxes are stored two deep on the 900mm deep shelving units. These units are generally positioned with an access aisle to both sides. If positioned against a wall, rear boxes will be obscured from view.

35 Box Archive Unit

Other heights and bay lengths are available.
For example, 840mm deep pallet racking can be used for effective double sided archive box storage allowing for increased storage heights. If you have a special requirement, please let us know.
